

Curriculum Intent: PE

“
We provide a curriculum based on firm foundations in our Early Years which allows for progression, challenge and inclusion right through to Year 6.
”

Through access to a high-quality Physical Education curriculum, opportunities to be healthy and active, and chances to shine through competition, we aim to develop within our pupils at a love of Physical Education, Sport and Activity.

We provide a curriculum based on firm foundations in our Early Years which allows for progression, challenge and inclusion right through to Year 6. Pupils are exposed to a wide and varied range of sports from football, rugby and netball; to tennis, rounders and cricket. They are encouraged to express themselves through gymnastics and dance and to challenge themselves through outdoor and adventurous activities. Our pupils in Years 5 and 6 benefit from developing and embedding team-work skills through further residential opportunities.

We recognise the value sport and physical activity can have in helping our children to develop lifelong skills, healthy lifestyles and values for life. We embed our own school values within our physical education curriculum and also promote the School Games values.

At Kingham, we understand that sport and physical activity reach beyond the PE lesson and provide our children with opportunities to be active, engaged and motivated to take part in a range of sporting competition, extra-curricular activities and daily physical activity.
